

Assignment -2

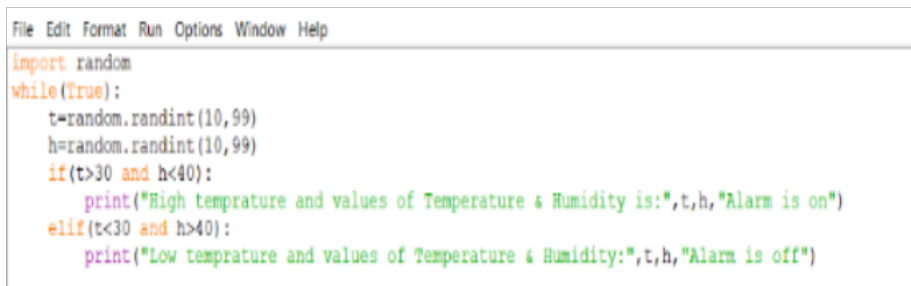

Python Programming

Question:

Build a python code, assume u get temperature and humidity values (generated with random function to a variable) and write a condition to continuously detect alarm in case of high temperature.

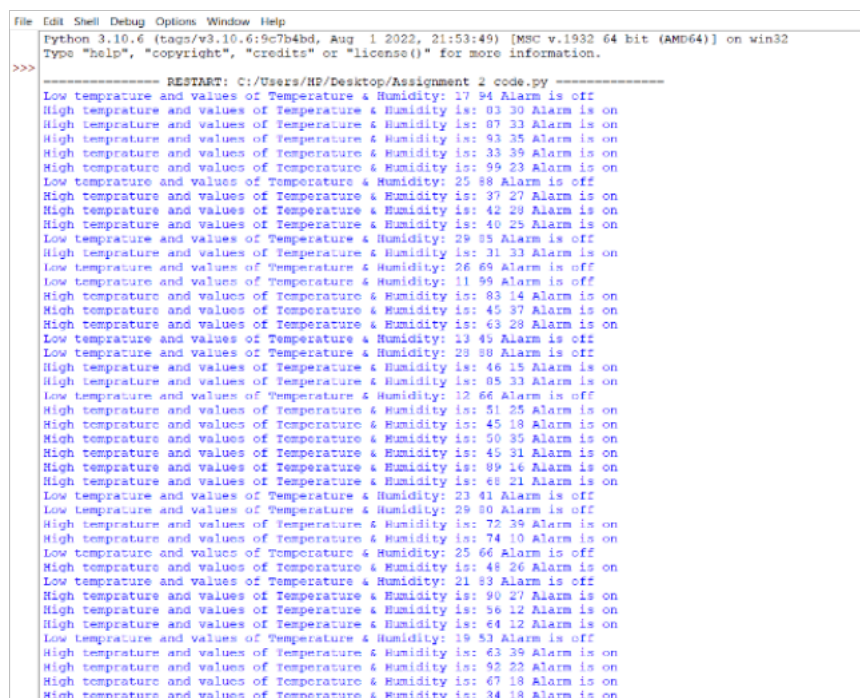

Solution:

```
import random
while(True):
    t=random.randint(10,99)
    h=random.randint(10,99)
    if(t>30 and h<40):
        print("High temperature and values of Temperature & Humidity
is:",t,h,"Alarm is on")
    elif(t<30 and h>40):
        print("Low temperature and values of Temperature & Humidity :
",t,h,"Alarm is off")
```

The screenshot shows a code editor with a menu bar (File, Edit, Format, Run, Options, Window, Help) and a text area containing the following Python code:

```
import random
while(True):
    t=random.randint(10,99)
    h=random.randint(10,99)
    if(t>30 and h<40):
        print("High temperature and values of Temperature & Humidity is:",t,h,"Alarm is on")
    elif(t<30 and h>40):
        print("Low temperature and values of Temperature & Humidity:",t,h,"Alarm is off")
```

The screenshot shows a terminal window with a menu bar (File, Edit, Shell, Debug, Options, Window, Help) and a text area displaying the output of the Python code. The output shows a series of random temperature and humidity values generated by the code, along with the corresponding alarm status (on or off).

```
Python 3.10.6 (tags/v3.10.6:9c7b4bd, Aug 1 2022, 21:53:49) [MSC v.1932 64 bit (AMD64)] on win32
